Dear Colleagues and Residents,

As Anatolia is a geographic bridge between East and West, Turkish Urology has been a scientific bridge connecting two continents since its establishment.

Turkish Society of Andrology has been acting as a pioneer of collaboration within Eurasia, strengthening the existing bridges. This concept was adopted by other sub-branches of urology in Turkey. Turkish Society of Andrology began its journey at 2006 Azerbaijan and continued in Uzbekistan, Kyrgyzstan, Sochie (Russia), Albania, Romania, Hungary, St. Petersburg (Russia), Denmark and Spain.

Orkhon Valley, first homeland of Turks, was selected as the Eastern Border of Eurasian Andrology Eurasian Andrology Summit will be held on 16 – 17 June 2016, Ulaanbaatar, Mongolia with the collaboration of Mongolia Urology/Andrology Association.

After 1400 years following the Great Immigration of Turkic Tribes from Central Asia to Western Lands, we feel the pride and excitement of returning to the habitat of our progenitors with the scientific collaboration.

Following the Symposium, Orkhon Inscriptions at Orkhon, Selenga and Tula River riverbeds may be visited if wanted.

This visit may establish a new perspective of Phallus Cult for Turkish Andrology Society, which is interested in the History of Andrology.

We will be very honored with your presence on our final destination of first lap of Eurasia Episode, Mongolia Symposium.

Sincerely,

Prof. Dr. İrfan Orhan
President of the
Turkish Society of Andrology

Prof. Dr. Ateş Kadioğlu
Secretary General of the
Eurasian Andrology Summit

Day 1 - 15 June 2016
